Education

California Polytechnic State University

San Luis Obispo, California

B.S IN COMPUTER SCIENCE, MATH MINOR, OVERALL GPA: 3.41

Expected: Jun. 2019

- Dean's List 2015/2017, White Hat Security Club, Computer Engineering Society

Experience

Microsoft

Redmond, Washington

SOFTWARE ENGINEER INTERN

Jun. 2018 - Sep. 2018

- Will develop on the frameworks team

Oracle

Redwood Shores, California

SOFTWARE ENGINEER INTERN

Sep. 2018 - Oct. 2018

- Designed new functionality with pre-existing infrastructure to reduce redundancies in the backend
- Evaluated previous system for **iOS** and **Android** applications to architect a plan to integrate new functionality seamlessly

Sentient Energy

Santa Clara, California

SOFTWARE ENGINEER INTERN

Jun. 2017 - Aug. 2017

- Developed a framework to automate validation of REST API for nightly builds saving **4 hours per method**
- Utilized **machine learning via TensorFlow** to automate classification of new methods creating a scalable environment
- Developed modules to parse information necessary to automate creation of REST API calls
- Automated the classification of methods to define expected outputs via **machine learning**
- Populate databases necessary for execution of test cases based on training data
- Validates back end by verifying dependent databases after a successful API call eliminating manual validation

Microcon

San Luis Obispo, California

SOFTWARE ENGINEER INTERN

Sep. 2016 - Jun. 2017

- Designed the frontend of the Employee Portal using HTML5, and JavaScript
- Developed the backend of the Employee Portal using C# and Microsoft SQL Server
- Integrated backend with previous infrastructure to handle scalability by not saving redundant data
- Created scripts for deployment processes during upgrades and releases
- Developed complex SQL scripts to reduce query times by 25%
- Integrated the Employee Portal with eHRSuite to synchronize all data and information about the employees

Projects

Facial Recognition Authentication for Clover Devices

San Francisco, California

BACK END ENGINEER

Jun. 2017 - Present

- Won **1st place** for the Clover challenge and won **3rd place** at the Global AI Hackathon
- Developed middleware for Clover Payment Devices to prevent fraudulent activity via Facial Recognition
- Designed a facial recognition program using TensorFlow to detect if a user is the person authorized to use the credit card
- Deployed a server using Google Cloud Platform to handle the requests for authenticating a user from the Clover device
- Integrated Clover's Android SDK to create a custom tender option that takes a picture of the person checking out to identify whether or not the person is fraudulent

Skills

Programming Python, C, Java, Swift, C#, SQL, JavaScript

Other HTML5, Git, Docker, Google Cloud Platform
