Daniel P. **Wong**

Castro Valley, CA & San Luis Obispo, CA

(510) 432-1118 | dwong56@calpoly.edu | www.danielwong.us | danwong | dapwong

Education

California Polytechnic State University · *San Luis Obispo, California*
B.S in Computer Science, Math Minor, Overall GPA: 3.46 · *Expected: Jun. 2019*

- Dean's List 2015/2017, White Hat Security Club, Computer Engineering Society

Experience

Oracle · *Redwood Shores, California*
Software Developer Intern · *Sep. 2017 - Current*

- Engineer on team developing for high priority clients
- Built infrastructure by writing an API used for numerous applications
- Developed **iOS** and **Android** applications

Sentient Energy · *Santa Clara, California*
Software Engineer Intern · *Jun. 2017 - Aug. 2017*

- Developed a framework to automate validation of REST API for nightly builds saving **4 hours per method**
- Utilized **machine learning via TensorFlow** to automate classification of new methods creating a scalable environment
- Developed modules to parse information necessary to automate creation of REST API calls
- Automated the classification of methods to define expected outputs via **machine learning**
- Populate databases necessary for execution of test cases based on training data
- Validates back end by verifying dependent databases after a successful API call eliminating manual validation

Microcon · *San Luis Obispo, California*
Software Engineer Intern · *Sep. 2016 - Jun. 2017*

- Designed the frontend of the Employee Portal using HTML5, and JavaScript
- Developed the backend of the Employee Portal using C# and Microsoft SQL Server
- Integrated backend with previous infrastructure to handle scalability by not saving redundant data
- Created scripts for deployment processes during upgrades and releases
- Developed complex SQL scripts to reduce query times by 25%
- Integrated the Employee Portal with eHRSuite to synchronize all data and information about the employees
- Reduced redundancies in the backend of the platform to increase scalability for the increasing number of clients

Projects

Facial Recognition Authentication for Clover Devices · *San Francisco, California*
Back End Engineer · *Jun. 2017 - Present*

- Developed middleware for Clover Payment Devices to prevent fraudulent activity via Facial Recognition
- Designed a facial recognition program using TensorFlow to detect if a user is the person authorized to use the credit card
- Won **3rd place** at the Global AI Hackathon in San Francisco and won **1st place** for the Clover challenge
- Deployed a server using Google Cloud Platform to handle the requests for authenticating a user from the Clover device
- Integrated Clover's Android SDK to create a custom tender option that takes a picture of the person checking out to identify whether or not the person is fraudulent

Machine Learning API · *San Francisco, California*
Team Lead · *Jun. 2017 - Present*

- Designed an API for commonly used machine learning models to support Hackathon team's artificial intelligence applications
- Deployed an API via Google Cloud to interface Clover payment devices and Chui's API

Skills

Programming Python, C, Java, Swift, C#, SQL, JavaScript
Other HTML5, Git, Docker, Google Cloud Platform
